

# SoStatic

Form backend for static websites  
with email forwarding

```
<form action="https://ssttc.xyz/{YOUR_KEY}">
  <input name="name">
  <input name="email">
  <textarea name="message"></textarea>
  <input type="submit" value="Submit">
</form>
```

## Features

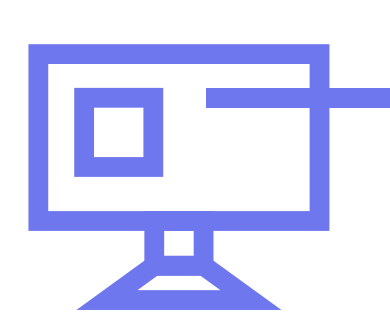

**We provide the backend**

Using SoStatic removes the need for developing, hosting and maintaining your own servers just for the simple task of receiving form submissions

**Zero dependencies**

Our solution uses the native HTML form submission process. The only library you will need to add is Google's ReCaptcha, if you decide to use it for spam filtering

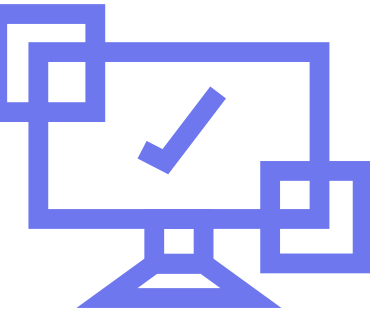

**Simple ReCaptcha validation**

With just a checkbox, you can integrate spam filtering on the using Google's recaptcha for free.

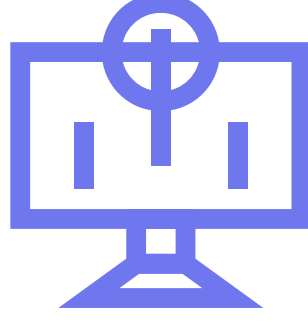

**Hide your email from the internet**

Using our service, you wont have to make your email public to the visitors, thus avoiding spam

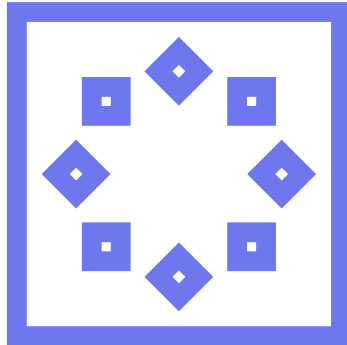

**Very quick setup**

Adding SoStatic to your website is as easy as replacing the Action parameter on your form

**Changes without redeployment**

You can change the behaviour of your form processing without needing to redeploy your website

**GDPR compliant**

We implement all the required mechanism to be compliant with GDPR and will guide you through adding them to your website as well

**Secure**

All communication can be done through SSL just by adding an 's' to the link we provide ;)

## Pricing

### Free for up to 100 valid messages / month

Free for up to 100 valid messages / month  
We understand that most small websites wont get more than a few contact messages per month. We offer our service for free for websites that receive less than 100 valid messages per month. A message is considered valid if the recaptcha was succesfully filled. Spam messages will not count towards your quota.

### What if you get over 100 valid messages per month?

The messages will not be lost, but they will no longer be forwarded to your email, they will only be accessible via our platform. If you find value in having all messages forwarded, we can setup a recurring payment method for **5\$ / month** for unlimited messages per month.

end of site

The idea behind the concept was the same as the one that drove the branding phase: generate and deliver a message as clear and as light as possible without losing any of the business fundamental elements. Keeping the main graphic element, the color spot, was a challenge that we met early on. To that we responded with a simple style, that matches the design system and allows for more breathing room on the page.

//render graphics  
//complete awesome projects

input name="SoStatic"

```
<form action="https://ssttc.xyz/{YOUR_KEY}">
  <input name="name">
  <input name="email">
  <textarea name="message"></textarea>
  <input type="submit" value="Submit">
</form>
